

SECAN 2.5 LOOKBOOK

 **FAIRLIGHT**

Secan 2.5

Back in November we launched the Secan 2.0. That update included the introduction of the Cempa 2.0 fork as well as full dynamo integration on the frame and fork. For the Secan 2.5 we have now added the Bentley x Fairlight Mk.2 dropouts (as featured on the Strael 3.0), increased tyre capacity to 2.4" tyres, added size specific tubes for the 61R&T sizes and spec'd colour matched forks as standard.

New on the Secan 2.5:

- Clearance for 61mm (width as measured) tyres.
- New 0.8mm heat-treated chainstays.
- New 0.8mm heat treated seatstays.
- New Bentley x Fairlight Mk.2 dropouts.
- New size specific top tube and seat stays for sizes 61R and 61T. Designed for bigger, stronger riders.
- Colour matched fork as standard.

Available to order from Tuesday 24th August
