# NEW FULL BIKE OPTION

As of April 2023 we are offering a Holt full-bike option featuring a Shimano XT drive-train, Rockshox SID Ultimate fork, Hunt Trail Wide wheels, Truvativ Atmos finishing kit and Vittoria tyres. As per all our other models there are several upgrade and add-on options, such as Hope and Chris King headsets, King Cages, alternative wheels and a PNW dropper post option. We are proud to offer products from top brands that we would choose to spec on our own builds. See the Holt Pricelist [here](#) for more detailed spec information. We think this full bike option offers great value considering the frame quality and the build spec.
